MS Word Plug-in Release Notes Dec 2013

MS Word Plug-in Release Notes Dec 2013

Overview

This document describes feature enhancements and fixed issues for Sugar Plug-in for Microsoft Word, December 2013 release.

Feature Enhancements

The following feature enhancements are included in this release of the Sugar Plug-in for Microsoft Word:

- **Highlight to indicate association complete** : The primary module record (e.g. Opportunities) is now highlighted once an associated record (e.g. Contacts) is selected while performing a mail merge.

Fixed Issues

The following issues have been resolved in this release of the Sugar Plug-in for Microsoft Word. Case Portal users can access the case portal for more details about each issue:

- **64034** : Adding additional fields to an existing mail merge template results in the field names displaying improperly for the newly added fields.
- **66218** : Invalid Merge Field message appears when performing mail merge with a template containing CampaignTargets_primary_address_postalcode field.

Supported Platforms

For a complete list of platform requirements and supported environments, please refer to the Plug-ins Supported Platforms page.
