Sugar Community Edition 6.5.16 Release Notes

Overview

This document describes enhancements to existing features, known and fixed issues, supported platforms, and acknowledgments for Sugar Community Edition 6.5.16.

For information on Sugar installation, upgrade, and conversion packages, see this Knowledge Base article.

Feature Enhancements

Enhancements to existing features for Release 6.5.16 are listed below:

- Ordering of users names in Assigned to field: The Assigned to field in advanced search now lists users names in order for non-English languages.
- Spellcheck for emails in Firefox : Browser-based spellcheck is now available in the TinyMCE editor when using Firefox based on a new config setting.
- Verification of current password when changing password : The current password must now be entered and verified when updating passwords in user preferences.

Fixed Issues

The fixes for Release 6.5.16 are detailed below:

- 29766 : The Run Nightly Mass Email Campaigns scheduler generates a PHP error when the hours interval is set using high to low numbers (e.g. 11-6).
- 41454 : Custom relationships with long names in module builder causes an error and prevents the package from deploying properly.
- 44138 : When a contact is related to a note via the Related to field, the note is not related to the contact as expected.
- 49723 : Workflow is not set to trigger on the correct date if the time condition is not the first condition created for time elapse workflow.
- 52419 : Popup list view does not respect the Disable Format option for Integer type fields.
- 53873 : Importing to the Any Email field does not map the value to records as expected or save to the database.
- 54423 : Clicking the Save button multiple times during a save improperly

-
- generates multiple duplicate records.
- 56973 : The SetPanelVisibility function does not hide the entire panel as expected.
 - 57322 : Trial or individual GoToMeeting accounts do not integrate successfully when attempting to connect via the External Accounts tab of the user's profile.
 - 58210 : Deleting email drafts with attachments does not delete the corresponding Note record created with the attachment.
 - 58818 : Sorting a custom multi-select field on a list view results in a database error.
 - 59797 : LDAP group membership responses are not correctly evaluated by Sugar, resulting in failed authentication.
 - 60141 : Float and Integer type fields incorrectly display a value (0 or 0.000000) when the default value is left blank in Studio.
 - 60483 : Using the get_modified_relationships on MSSQL Stacks results in a FATAL error.
 - 60758 : Attempting to view completed tasks via the project's Gantt chart fails to load the chart properly to display all completed tasks.
 - 60936 : Adding a custom field to the Users list view then creating a custom field in a separate module causes the Users list view to no longer display any users.
 - 61343 : Documents with large attachments do not download the file as expected.
 - 61608 : System log files have the potential to be named with incorrect sequence numbers.
 - 61818 : Cron job stalls due to high CPU usage (100%) and causes inbound emails to not import properly.
 - 61966 : Turning off the Elastic search server causes Full Text Search to break and cannot be re-enabled.
 - 62294 : Billing street value disappears upon save in edit view when user is assigned a role with Billing Street field set to "Read Only".
 - 63403 : Meetings scheduled longer than one week only displays the meeting for the first week when viewing the calendar in Week view.
 - 63651 : Emails deleted from the Emails module does not get flagged as deleted in the database as expected.
 - 63710 : Creating and editing multiple activities via a module record results in large memory usage for IE9 and causes browser to hang.
 - 63831 : Attempting to add a dropdown option via the Dropdown Editor results in an error.
 - 63990 : Changing the label for custom module relationships and subpanels does not save as expected.
 - 64124 : Group inboxes are queried for unread email count twice upon loading of the Emails module which negatively affects performance.
 - 64150 : The settings (1000s separator and Decimal Symbol) in user preferences are not properly respected causing currency field values to import incorrectly.

-
- 64229 : Setting the Meetings edit view layout to tabs causes the Add Invitees search to not work as expected when scheduling a meeting.
 - 64415 : Accessing the Sugar News dashlet triggers mixed content warning in browser.
 - 64627 : Editing stock fields causes SQL errors when deploying custom modules.
 - 64734 : Time elapse workflow with custom Date type fields cause PHP error when saving a record after upgrading.
 - 64753 : The Edit View layout does not respect the Max Size limit set for address fields (e.g. billing street, billing state) in Studio.
 - 64814, 65264 : Time-elapse workflows incorrectly store records for later triggering when the workflow's conditions are not met.
 - 64822 : LinkedIn connector does not work as expected due to an incomplete removal of the connector from Sugar.
 - 64959 : Sorting by Team field in list view does not sort as expected.
 - 65023 : Merging records in Sugar incorrectly changes the Created by field for the primary record.
 - 65271 : SMTP email password gets cleared in Admin > Email Settings when accessed by a non-default admin user causing "Send Test Email" to fail.

For more information on a bug or to provide feedback, use the SugarCRM Bug Tracker located at <http://www.sugarcrm.com/support/bugs.html>. To view the complete list of bugs fixed in this specific release, run a search using "6.5.16" in the Targeted Release field. Look for the bugs marked "Fixed" in the Resolution field.

To report a new issue found in this release, use "6.5.16" in the Found in Release field. Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

Supported Platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).

Acknowledgments

SugarCRM would like to thank the following community members for their help in resolving issues in Release 6.5:

- Aleš Pudil
- Alexei Avramenko, Letrium

-
- Antonio Musarra
 - Aurélien Requiem, Loaded Technologies
 - Björn Schotte, Mayflower GmbH
 - Cedric Mourizard, Synolia
 - Daniel Gadd, Aura Information Security
 - Danil Sazonov, Richlode Solutions
 - Dave Miller
 - Enrico Simonetti, InsightfulCRM, Australia
 - Fabio Grande, Poker Spa
 - Frank Saguma
 - Jason Eggers
 - Jeff Bickart, NEPO Systems, LLC
 - Jens Jahnke, Telematika
 - João Morais, DRI - Consultoria Informatica, Lda.
 - Johan Westin, Redpill-Linpro
 - Jon Auer
 - Jonathan Cutting, EnableIT SugarUK Technologies Ltd
 - Kawai Cheung, OSSCRM, Inc.
 - Masaki Fukumitsu
 - Matthew Poer, Profiling Solutions
 - Maxime Dauphin
 - Rasmus Haglund
 - Ray Gauss
 - Tony Lin, Kratos Defense
 - Yannick Biet, Captivea
 - Yoann Hercouet, System in Motion
