Sugar Enterprise 6.7.6 Release Notes

Overview

This document describes the changes in Sugar 6.7.6. Sugar 6.7.6 is available for Sugar On-Demand (Sugar-hosted SaaS) deployments only.

Known Issues

The following are known issues with Sugar 6.7.6:

- 59109: Sales managers' "No Opportunities" checkbox available in User Profile > Advanced is not respected in the Forecasts module.
- 59213 : Renaming the Forecasts module in Admin > Rename Modules does not affect all instances of the word "Forecast".
- 61232 : After an opportunity is first loaded to the Forecasts module, any updates to the opportunity's probability will not affect its forecasting range. The opportunity will retain the original range designation throughout the sales cycle according to its original probability.
- 67579 : The IBM SmartCloud Connector does not allow users to access their SmartCloud accounts.

Fixed Issues

The issues resolved in Sugar 6.7.6 are detailed below:

- 47170 : Currency amount fields are not right justified in reports.
- 58850 : Workflow alert emails including multiselect fields as variables show their database values rather than their display labels.
- 61294 : Reports do not display custom integer fields with the formatting specified on a user's preferences.
- 63840 : Users with the Notify on Assignment option disabled incorrectly receive assignment emails.
- 64649 : Bounced emails from campaigns are not identified and handled correctly.
- 64669, 68473, 68602 : Attempting to export fails with a database error when searching based on a related record and using the "Select All" functionality.
- 64744, 64960, 66901, 67061 : Studio changes to custom relationship labels and custom package labels may not be respected.
- 64961 : Inaccurate summations are displayed on Summation With Details

reports when result records were saved in a currency which has since been deleted.

- 64988 : Modifying the parent_name field of the Calls, Meetings, or Tasks modules via Studio disallows calls, meetings, or tasks from being saved with the Related To field populated.
- 65346 : Changes to Project Task records may not be saved.
- 65600 : Workflow email template variables may produce emails with inaccurate values when multiple emails are triggered at once.
- 65755 : Calculated fields based on related record values do not populate on initial save.
- 65863 : Reports filtering on multiselect fields using the "Is One Of" criteria may return non-matching records when the database value of one multiselect option matches the beginning of the database value of another.
- 65928 : The My Calendar dashlet may display calendar items at incorrect times when multiple events are scheduled for the same time on the same day.
- 66027 : Meetings may be created multiple times in Sugar when assignment notifications are received by a Sugar Email Archiving email address.
- 66057 : Opportunities are not included in forecasts when their probabilities are updated to a value on the edge of the Included category's range.
- 66095 : Chart legends are not ordered as expected in Summation or Summation with Details reports.
- 67290 : Home page dashlets may not appear when connection speed is poor.
- 67639 : Importing records with related records' ID and name fields may cause incorrect relationships to be created.
- 67748 : Opted-out email addresses are not indicated as opted-out when displayed in subpanels.
- 67787, 67824 : Currency values displayed report charts may not be formatted correctly.
- 67825 : Custom relationship field values are not displayed in list views.
- 67830 : Dependent dropdown fields within multiple layers of dependency may be incorrectly visible when their dependencies are not satisfied.
- 67841, 68776 : Archived emails in the History subpanel do not display the first name of the Assigned To user.
- 67879, 67909, 68020 : Relationship fields are not included when exporting records.
- 67973 : Global search does not return matching records when searching for email addresses which include mixed capitalization or multiple periods.
- 67977 : Scheduled reports which fail to complete normally may cause delays to the running of other scheduler jobs.
- 68026 : Primary email addresses are included twice when exporting records.
- 68048 : Lead creation causes a SQL error when disable_count_query is enabled in config_override.php.
- 68063 : Workflow actions are prevented from executing when the module contains a field calculating a count of related records.
- 68252 : Products with current or previous relationships to opportunities are not displayed or hidden as expected in the Products module.

-
- 68324 : Fields set to be excluded from duplicate merge are available during duplicate merge.
 - 68414 : Workflows may not be created by duplication.
 - 68470 : After Time Elapses workflows may suffer performance issues due to not respecting conditions based on related records.
 - 68479 : Workflows with secondary conditions in related modules do not trigger even if all conditions are met.
 - 68507 : Web service calls which retrieve user names only return the user's last name rather than both the first and last names.
 - 68562 : Meeting invitations delivered in Spanish are missing special characters.
 - 68708 : Report filters may have unintended values when the report contains multiple run-time filters on date fields.
 - 68742 : Using ISO-8859-1 as the export and import character set causes special characters to be corrupted after exporting and importing records.
 - 68854 : Dropdown fields marked as required prevent records from being able to save.
 - 68901 : Records do not sync correctly from Sugar to the Outlook Plug-In if the default team of the user is not equal to the primary team of the record.
 - 68908 : Custom modules deployed with the Date Created and Date Modified fields hidden from its layouts do not display creating and modifying user names and may display incorrect values for these fields if the fields are later added to its layouts via Studio.
 - 69345 : The campaign log activity date is not populated when leads are created via a web-to-lead form.

For more information on a bug or to provide feedback, use the SugarCRM Bug Tracker located at <http://www.sugarcrm.com/support/bugs.html>. To view the complete list of bugs fixed in this specific release, run a search using "6.7.6" in the Targeted Release field. Look for the bugs marked "Fixed" in the Resolution field.

To report a new issue found in this release, use "6.7.6" in the Found in Release field. Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

Supported Platforms

For information on supported platform components, see [Sugar 6.7.x Supported Platforms](#).

Acknowledgments

SugarCRM would like to thank the following community members for developing

feature enhancements and defect resolutions in Release 6.7:

- Jeff Bickart, NEPO Systems, LLC
- Jonathan Cutting, EnableIT SugarUK Technologies Ltd.
- Cedric Mourizard, Synolia
- Stephen Ostrow
- Dan Reid, DocuSign, Inc.

- Christian Zuckschwerdt
