# Sugar Enterprise 6.7.3 Release Notes

## Overview

This document describes the changes in Sugar Enterprise 6.7.3, which is available for Sugar On-Demand (Sugar-hosted SaaS) deployments only.

## Known Issues

The following are known issues with Sugar 6.7.3:

- Renaming the Forecasts module in Admin > Rename Modules does not affect all instances of the word "Forecast". Associated defect: 59213
- Sales managers' "No Opportunities" checkbox available in User Profile > Advanced is not respected in the Forecasts module. Checking this box will not prevent the user from seeing a row and a worksheet for their own opportunities. Associated defect: 59109
- After an opportunity is first loaded to the Forecasts module, any updates to the opportunity's probability will not affect its forecasting range. The opportunity will retain the original range designation throughout the sales cycle according to its original probability. Associated defect: 61232
- Reports filtering by date fields using the quarter, fiscal quarter, and fiscal year pre-defined filters adjust for timezone causing records falling near the beginning or end of the period to be incorrectly included or excluded. Associated defect: 64613

## Fixed Issues

The fixes for Release 6.7.3 are detailed below:

- 64708 : Reports attempting to sum custom currency fields will not run and incorrectly report an invalid field.
- 64731 : After upgrading to 6.7.2, attempting to save a time-elapse workflow created against custom date fields fails with an error.
- 64750 : Creating or importing an opportunity with a Sales Stage of 'Closed Won' or 'Closed Lost' causes the amount to be set incorrectly to zero.
- 64815, 65018 : Time-elapse workflows incorrectly store records for later triggering when the workflow's conditions are not met.
- 64821 : Relationships to custom modules do not allow the relationship name or subpanel to be relabeled via Studio.

- 
- 64915 : Changing the currency type on a closed opportunity incorrectly modifies the amount in the system's default currency.
  - 64980 : Matrix reports calculate and display display incorrect summations.

For more information on a bug or to provide feedback, use the SugarCRM Bug Tracker located at <http://www.sugarcrm.com/support/bugs.html>. To view the complete list of bugs fixed in this specific release, run a search using "6.7.3" in the Targeted Release field. Look for the bugs marked "Fixed" in the Resolution field.

To report a new issue found in this release, use "6.7.3" in the Found in Release field. Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

## Supported Platforms

For information on supported platform components, see [Sugar 6.7.x Supported Platforms](#).

## Acknowledgments

SugarCRM would like to thank the following community members for developing feature enhancements and defect resolutions in Release 6.7:

- Cedric Mourizard, Synolia
- Stephen Ostrow
- Jeff Bickart, NEPO Systems, LLC
