Sugar Corporate 6.7.8 Release Notes

Overview

This document describes the changes in Sugar 6.7.8. Sugar 6.7.8 is available for Sugar On-Demand (Sugar-hosted SaaS) deployments only.

Fixed Issues

Sugar 6.7.8 is a security update released to address certain security vulnerabilities identified during our routine QA checks. All on-demand 6.7 instances have already been upgraded to 6.7.8 to address the following types of malicious third party attacks:

- 71874 : Authenticated users may cause arbitrary code to be executed.
- 71875 : Authenticated users may initiate a cross-site scripting attack.
- 71876 : Authenticated admin users may install a package that overwrites restricted files.
- 71877 : Instances with SAML authentication enabled were vulnerable to XML External Entity (XXE) attacks.

SugarCRM Mobile

Customers utilizing the SugarCRM Mobile application will need to upgrade the application to our latest release, version 2.3.1, in order to maintain full mobile functionality. Release 2.3.1 is already available for download from the app stores (Apple, Google), and customers are encouraged to upgrade to this version at their earliest convenience. Sugar instances do not need to be upgraded before upgrading SugarCRM Mobile applications to 2.3.1.

Known Issues

The following are known issues with Sugar 6.7.8:

- 59109: Sales managers' "No Opportunities" checkbox available in User Profile > Advanced is not respected in the Forecasts module.
- 59213 : Renaming the Forecasts module in Admin > Rename Modules does not affect all instances of the word "Forecast".

-
- 61232 : After an opportunity is first loaded to the Forecasts module, any updates to the opportunity's probability will not affect its forecasting range. The opportunity will retain the original range designation throughout the sales cycle according to its original probability.
 - 67579 : The IBM Smartcloud Connector does not allow users to access their Smart Cloud accounts.
 - 71683 : When choosing to create new and update existing records during import, the confirmation dialog does not display the correct text. The text should read "You have selected to update records during the import process. Updates made to existing records cannot be undone. However, records created during the import process can be undone (deleted), if desired. Click Cancel to select to create new records only, or click OK to continue." Clicking "OK" allows the import to proceed.

Supported Platforms

For information on supported platform components, see [Sugar 6.7.x Supported Platforms](#).

Acknowledgments

SugarCRM would like to thank the following community members contributing to release 6.7:

- Egidio Romano
- Jeff Bickart, NEPO Systems, LLC
- Jeff Bickart, Ticomix, Inc.
- Jonathan Cutting, EnableIT SugarUK Technologies Ltd.
- Cedric Mourizard, Synolia
- Stephen Ostrow
- Dan Reid, DocuSign, Inc.
- Securenetwork.it

- Christian Zuckschwerdt
