What to Expect When Upgrading to 8.3

Overview

Upgrades to Sugar 8.3 are available or required for instances according to the following guidelines:

- All instances hosted on Sugar's cloud service will be upgraded to 8.3.

For the upgrade, please keep in mind that there are some key features of 8.2.x which have changed or are not available in Sugar 8.3.x. Some of the items that are unavailable in Sugar 8.3.x may be made available in a future release. To help provide you with the necessary information, this article covers what to expect when your instance is upgraded from 8.2.x to 8.3.x.

For information regarding changes and functionality available in 8.3.x, please refer to the [8.3 Release Notes](#) specific to your Sugar edition.

Feature Disparity Between Fall '18 (8.2.x) and Winter '19 (8.3.x)

8.2.x features that have been changed or are no longer available in 8.3.x are as follows:

Category	Feature	Sugar 8.2.x Behavior	Sugar 8.3.x Behavior
Administration	Advanced Workflow Settings	The "Cycle Number of Errors" setting for Advanced Workflow is found in Admin > Advanced Workflow > Settings.	The "Cycle Number of Errors" setting for Advanced Workflow is found in Admin > System Settings in the Advanced Workflow panel. Auto-save and auto-validate options have also been added to this panel.
Advanced Workflow	Process Validation	When using the Visual Designer to create a Process Definition, real-time sequencing	When using the Visual Designer to create a Process Definition, sequencing errors

		errors are displayed to the right of the design canvas in the Element Errors panel.	and configuration warnings are displayed below the design canvas in the Process Validation panel. Instead of giving real-time feedback, the validator runs at admin-specified intervals (every 30 seconds by default).
Reports	Export	Reports that are created as the Rows and Columns type can be exported to CSV.	All report types have the Export option and can be exported to CSV by users who have Export role permissions enabled.
