wActivities Release Notes

Overview

This document describes any feature enhancements, fixed issues, and known issues for the wActivities plug-in for SugarCRM.

wActivities 7.0

Feature Enhancements

The following feature enhancement is available in this release:

- Added support for Sugar 11.0.0.

Fixed Issues

The following fixes are available in this release:

- The 'Enabled Search Filters', 'Buttons Buttons Display Type', and 'Enabled Create Actions' options are disabled and cannot be configured from the wActivities configuration section from Admin > Configure Subpanels Labels and Buttons.

Known Issues

The following known issue is present in version 7.0:

- Setting any wActivities/wHistory record as a favorite or changing the status fails and produces a 500 error.

For the most up-to-date information on supported platforms, please refer to the [wActivities User Guide](#).
