Sugar Professional 6.5.13 Release Notes

Overview

This document describes enhancements to existing features, known and fixed issues, supported platforms, and acknowledgments for Sugar 6.5.13.

Feature Enhancements

Enhancements to existing features for Release 6.5.13 are listed below:

- Date created for archived emails : Emails archived through the API now reflect the date created based on the actual date email was sent rather than the date it was archived.
- Related bean in logic hook : Before_relationship_add and after_relationship_add logic hooks now pass in the related bean through the \$arguments parameter.

Known Issues

The following are known issues with Sugar 6.5.13:

- Shipping not updating due to Sugar Logic : Shipping field in the Grand Total and Line Items section of quotes does not update as expected when the Shipping field is calculated via Sugar Logic.
Bug associated with this issue: 62064

Fixed Issues

The fixes for Release 6.5.13 are detailed below:

- 42444 : Contract term displays with a decimal value when the contract start date and end date spans through a daylight savings time adjustment.
- 52331 : Dashlets set to "Do not auto-refresh" on the user's Home page inherits the system's minimum auto-refresh interval improperly.
- 52901 : Report legend does not display and renders the chart incorrectly

-
- when an account has no type or industry defined.
- 54203 : Custom iFrame field does not display properly in detail view when the email field is inserted to the generated URL.
 - 54405 : Undoing the import for new contacts does not remove the relationship between the contact and account.
 - 55456 : Running reports with large amounts of data results in an error due to PHP memory limitations.
 - 56965 : The email address is case sensitive when requesting a password reset via the Forgot Password feature.
 - 57618 : Currency symbol and name fields do not display properly on mail merge template.
 - 58149 : Facebook connector fails to connect due to unsupported protocol.
 - 59106 : Clicking the merge button twice when performing a merge causes all records where parent_id is blank to be automatically related to the resulting merged record.
 - 60732 : Module loader fails to install layouts from a package containing Studio export customizations.
 - 60790 : Primary workflow actions do not trigger secondary workflows.
 - 60912 : Dependent visibility formula incorrectly applies to all fields with the same name in the application.
 - 61315 : Relate fields containing module name causes reports to fail and results in a database error.
 - 61537 : Performing quicksearch using a leading wildcard character (%) does not return results.
 - 61734 : Merging duplicate records with calculated fields results in a PHP error.
 - 61817 : Group Name fields with quotation marks display incorrectly when editing a quote after initial save.
 - 61973 : Accessing campaign from Leads list view results in an error.
 - 62040 : Dashlets for custom modules do not properly display filters and fields pertaining to custom relationships on the Users module.
 - 62167 : Read only role on date fields without a default value causes workflow to not trigger as expected.
 - 62249 : The Reply All function on emails does not include all recipients properly on the email's CC field.
 - 62329 : Attempting to use pagination in a subpanel results in an error in MSSQL.
 - 62414 : This Month filter on reports does not respect the user's timezone.
 - 62683 : Custom sort order is not maintained when using pagination in the pop-up window.

For more information on a bug or to provide feedback, use the SugarCRM Bug Tracker located at <http://www.sugarcrm.com/support/bugs.html>. To view the complete list of bugs fixed in this specific release, run a search using "6.5.13" in the Targeted Release field. Look for the bugs marked "Fixed" in the Resolution field.

To report a new issue found in this release, use "6.5.13" in the Found in Release field. Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

Supported Platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).
