Sugar Professional 6.5.11 Release Notes

Overview

This document describes enhancements to existing features, known and fixed issues, supported platforms, and acknowledgments for Sugar 6.5.11.

Feature Enhancements

Enhancements to existing features for Release 6.5.11 are listed below:

- **Calendar's More Information** : Additional fields have been added to the pop-up More Information box within the Calendar module.
- **Calendar View Persistence** : A user's calendar will now preserve the last view setting (i.e. Week or Month) for the duration of the session.
- **Completed Activities View Option** : Users may now choose whether or not to display completed activities on their calendar using an option in the calendar's Settings panel.
- **Dynamic Email From Address** : The From email address and name may now be dynamic as specified on a workflow email template.
- **Multiple Email Addresses as BCC** : All To email addresses may now be easily moved to BCC.
- **Lead Conversion Account** : Existing account name populates when searching for account during lead conversion.
- **vCard Error Detection** : Creating records via vCard now includes formatting error detection.

Fixed Issues

Due to the high volume of bugs fixed in Release 6.5.11, only prominent fixes are detailed below:

- **37435** : Searching within Knowledge Base fails to return results when multibyte language used.
- **42158** : Bounced emails are not imported when monitoring multiple folders from the same Sugar bounce-handling inbox.
- **42874** : Sorting within panels in the View Status page of a newsletter campaign causes default marketing record filter to be disregarded.
- **43368** : REST API calls requiring a response in JSON format instead receive text/html response.

-
- 44467 : Relate fields in reports based on custom modules do not link correctly to record detail views.
 - 48697 : Invalid users appear as an option to receive records when reassigning records in the Users module.
 - 52584 : Time-elapse workflows do not trigger based on values in a calculated field.
 - 53231 : Teams selected in Advanced Search cannot be removed.
 - 54990 : Attempting to use pagination when sorting a report results in a database error in MSSQL.
 - 55436 : Renaming a module does not update the name in a related record's flex relate module dropdown.
 - 55979 : Sorting a report that includes a DateTime field filter when the user's date format does not match the database's date format causes the filter to break.
 - 56559 : Opening two quick create panels at once causes the second to open in a new browser tab.
 - 56642 : Quick creating a Lead or Content from within the Emails module does not auto-populate the email address.
 - 56761 : Save does not complete when a required field is not displayed due to dependency not being met.
 - 56917 : Attempting to send a campaign to an email address containing an apostrophe results in a database error.
 - 57168 : Full Text Global Search incorrectly excludes modules when users have a role affecting their ability to list records for that module.
 - 57652 : Product fields are not calculated correctly when product template's currency does not match the default currency.
 - 58711 : Related to field able to be modified from related record's subpanel despite field marked as uneditable in the user's role.
 - 59721 : Updates to products incorrectly changing quote totals where the product is included by disregarding the quote's discounts.
 - 59795 : Meetings' pop-up list view retains date value in searching after search has been cleared.
 - 59951 : Sorting a summation report by the count of a related field results in a database error.
 - 60203 : Custom sort order not respected in Users' pop-up list view.
 - 60645 : Links to user records from a report result in an error message.
 - 60688 : Roles preventing viewing of email addresses of records fails to prevent user creating an email to the record and viewing the email address within the email's To field.
 - 61054 : Radio button field unable to be used in a Sugar Logic dependency formula.
 - 61252 : Full Text Search indexing fails to complete on modules with large data sets.

For more information on a bug or to provide feedback, use the SugarCRM Bug Tracker located at <http://www.sugarcrm.com/support/bugs.html>. To view the

complete list of bugs fixed in this specific release, run a search using "6.5.11" in the Targeted Release field. Look for the bugs marked "Fixed" in the Resolution field.

To report a new issue found in this release, use "6.5.11" in the Found in Release field. Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

Supported Platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).

Acknowledgments

SugarCRM would like to thank the following community members for their help in resolving issues in Release 6.5:

- Alexei Avramenko, Letrium
- Antonio Musarra
- Aurélien Requiem, Loaded Technologies
- Björn Schotte, Mayflower GmbH
- Cedric Mourizard, Synolia
- Daniel Gadd, Aura Information Security
- Danil Sazonov, Richlode Solutions
- Enrico Simonetti, InsightfulCRM, Australia
- Fabio Grande, Poker SpA
- Frank Saguma
- Jason Eggers
- Jeff Bickart, NEPO Systems, LLC
- Jens Jahnke, Telematika
- João Morais, DRI - Consultoria Informatica, Lda.
- Johan Westin, Redpill-Linpro
- Jonathan Cutting, EnableIT SugarUK Technologies Ltd
- Kawai Cheung, OSSCRM, Inc.
- Matthew Poer, Profiling Solutions
- Ray Gauss
- Tony Lin, Kratos Defense
- Yannick Biet, Captivea
