# Sugar Professional 6.5.10 Release Notes

## Overview

This document describes enhancements to existing features, known and fixed issues, supported platforms, and acknowledgments for Sugar 6.5.10.

## Feature Enhancements

Enhancements to existing features for Release 6.5.10 are listed below:

- Importing contracts : The Contracts module tab now includes an Import option in its Actions dropdown menu.
- Email reply-all : The option to reply to all recipients is now available when viewing an email.
- Converting leads to existing contacts : Studio now allows the option for Admins to configure lead conversion such that an existing contact record may be found and selected rather than requiring a new contact record to be created.
- REST JSONP callback : JSONP callback support now included when accessing Sugar's REST API from external JavaScript.
- XHProf logging : XHProf logging is now supported given that the library is installed. More information can be found in the [6.5 Developer Guide](#).
- Call and meeting attendance : When a call or meeting is created, the creator's status is now automatically set to "Accepted".
- Attendee status for iCal : Viewing calls and meetings in iCal now includes the participation status of all attendees when using the iCal integration.

## Fixed Issues

Due to the high volume of bugs fixed in Release 6.5.10, only bugs with escalations and High/Urgent Priorities have been listed below:

- 55641 : Export to CSV may not complete for multibyte languages.
- 57850 : Creation of a target list from campaign results does not respect filtering by an email marketing record.
- 56908 : Studio changes to module panels may prevent correct display of some panels or fields.
- 57454 : Query string requires encoding for SAML login.
- 59069 : Use of a blank date field in a Sugar Logic calculated field results in an

- 
- error.
- 60152 : Email variables inserted via the TinyMCE editor are corrupted upon save.
  - 59047 : Dependent field calculations only calculate properly in a subpanel when all referenced fields are also present in that subpanel.
  - 60245 : Calls and meetings created from the contacts detail view are not automatically related to the contact.
  - 59441 : Reports grouping by a calculated field using MSSQL result in an error.
  - 59144 : Sugar Logic dependency based on field within a related held call results in an error.
  - 59250 : Call and meeting pop-up alerts are not displaying with consistency.
  - 59126 : Activities dashlets allow filtering by last name of related contact rather than full name.
  - 58841 : Project tasks not able to be selected, mass updated, or exported from the Project Task list view.
  - 27097 : Opportunities are not filtered correctly when drilling into an Opportunities dashlet chart.

For more information on a bug or to provide feedback, use the SugarCRM Bug Tracker located at <http://www.sugarcrm.com/support/bugs.html>. To view the complete list of bugs fixed in this specific release, run a search using "6.5.10" in the Targeted Release field. Look for the bugs marked "Fixed" in the Resolution field. Supported Platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).

## Acknowledgments

SugarCRM would like to thank the following community members for their help in resolving issues in Release 6.5:

- Alexei Avramenko, Letrium
- Aurélien Requiem, Loaded Technologies
- Björn Schotte, Mayflower GmbH
- Cedric Mourizard, Synolia
- Danil Sazonov, Richlode Solutions
- Enrico Simonetti, InsightfulCRM, Australia
- Fabio Grande, Poker SpA
- Frank Saguma
- Jason Eggers
- Jeff Bickart, NEPO Systems, LLC
- Jens Jahnke, Telematika

- 
- João Morais, DRI - Consultoria Informatica, Lda.
  - Johan Westin, Redpill-Linpro
  - Kawai Cheung, OSSCRM, Inc.
  - Ray Gauss
  - Tony Lin, Kratos Defense
  - Yannick Biet, Captivea
