Sugar Professional 6.5.16 Release Notes

Overview

This document describes enhancements to existing features, known and fixed issues, supported platforms, and acknowledgments for Sugar 6.5.16.

Feature Enhancements

Enhancements to existing features for Release 6.5.16 are listed below:

- Ordering of users names in Assigned to field: The Assigned to field in advanced search now lists users names in order for non-English languages.
- Quarterly options added to report filter for Date fields : This quarter, Last quarter, and Next quarter options are now available to select when defining report filters using Date type fields.
- Spellcheck for emails in Firefox : Browser-based spellcheck is now available in the TinyMCE editor when using Firefox based on a new config setting.
- Verification of current password when changing password : The current password must now be entered and verified when updating passwords in user preferences.

Known Issues

The following are known issues with Sugar 6.5.16:

- 62064 : Shipping not updating due to Sugar Logic : Shipping field in the Grand Total and Line Items section of quotes does not update as expected when the Shipping field is calculated via Sugar Logic.

Fixed Issues

The fixes for Release 6.5.16 are detailed below:

- 29766 : The Run Nightly Mass Email Campaigns scheduler generates a PHP error when the hours interval is set using high to low numbers (e.g. 11-6).
- 37960 : Report generates incorrect results when fields are included in a filter

-
- with an OR operator and the same fields are added as Group By conditions.
- 41454 : Custom relationships with long names in module builder causes an error and prevents the package from deploying properly.
 - 44138 : When a contact is related to a note via the Related to field, the note is not related to the contact as expected.
 - 48520 : Cases and Knowledge Base modules does not display the corresponding subpanel or related record field as expected for the one-to-many relationship.
 - 49723 : Workflow is not set to trigger on the correct date if the time condition is not the first condition created for time elapse workflow.
 - 50457 : Creating a report using custom multi-select fields displays a warning message and does not generate as expected.
 - 51182 : When viewing the Summation with Details-type report via Excel Plug-in, it displays the summary but does not include the reports details (e.g. opportunity name, account name etc.).
 - 51792 : Product Category "sort" field not respected when adding product to Quote.
 - 52419 : Popup list view does not respect the Disable Format option for Integer type fields.
 - 52751 : Calculated fields using the monthofyear() function does not display the correct calculation on edit views when the user's date format is set to DD/MM/YYYY.
 - 53873 : Importing to the Any Email field does not map the value to records as expected or save to the database.
 - 54423 : Clicking the Save button multiple times during a save improperly generates multiple duplicate records.
 - 55009 : Dependent dropdown options do not display correctly when the parent dropdown option is a custom value.
 - 56973 : The SetPanelVisibility function does not hide the entire panel as expected.
 - 57322 : Trial or individual GoToMeeting accounts do not integrate successfully when attempting to connect via the External Accounts tab of the user's profile.
 - 58027 : Duplicating a quote does not display the product rows and comments in the same order as the original quote.
 - 58210 : Deleting email drafts with attachments does not delete the corresponding Note record created with the attachment.
 - 58427 : Accessing a report via the direct URL does not respect team restriction.
 - 58818 : Sorting a custom multi-select field on a list view or report results in a database error.
 - 59797 : LDAP group membership responses are not correctly evaluated by Sugar, resulting in failed authentication.
 - 60141 : Float and Integer type fields incorrectly display a value (0 or 0.000000) when the default value is left blank in Studio.
 - 60445 : Adding Product Catalog items to a quote using the search in the

-
- selection window causes an incorrect unit price of \$0 to be displayed.
- 60483 : Using the `get_modified_relationships` on MSSQL Stacks results in a FATAL error.
 - 60758 : Attempting to view completed tasks via the project's Gantt chart fails to load the chart properly to display all completed tasks.
 - 60936 : Adding a custom field to the Users list view then creating a custom field in a separate module causes the Users list view to no longer display any users.
 - 61343 : Documents with large attachments do not download the file as expected.
 - 61608 : System log files have the potential to be names with incorrect sequence numbers.
 - 61818 : Cron job stalls due to high CPU usage (100%) and causes inbound emails to not import properly.
 - 61966 : Turning off the Elastic search server causes Full Text Search to break and cannot be re-enabled.
 - 62102 : The Parent Type display column in reports incorrectly displays "Prospects" instead of "Targets" for calls related to the Targets module.
 - 62294 : Billing street value disappears upon save in edit view when user is assigned a role with Billing Street field set to "Read Only".
 - 63403 : Meetings scheduled longer than one week only displays the meeting for the first week when viewing the calendar in Week view.
 - 63532 : Creating a report using custom fields set to "read only" in the file system results in an error.
 - 63651 : Emails deleted from the Emails module does not get flagged as deleted in the database as expected.
 - 63710 : Creating and editing multiple activities via a module record results in large memory usage for IE9 and causes browser to hang.
 - 63831 : Attempting to add a dropdown via the Dropdown Editor results in an error.
 - 63990 : Changing the label for custom module relationships and subpanels does not save as expected.
 - 64061 : Lotus Notes Plug-in sync of calendar items has problems due to Sugar Calendar not respecting RFC 5545 for line lengths and line endings.
 - 64124 : Group inboxes are queried for unread email count twice upon loading of the Emails module which negatively affects performance.
 - 64150 : The settings (1000s separator and Decimal Symbol) in user preferences are not properly respected causing currency field values to import incorrectly.
 - 64229 : Setting the Meetings edit view layout to tabs causes the Add Invitees search to not work as expected when scheduling a meeting.
 - 64415 : Accessing the Sugar News dashlet triggers mixed content warning in browser.
 - 64540 : Creating product records by selecting an item from the Product Catalog fails due to a typo in the metadata file.
 - 64627 : Editing stock fields causes SQL errors when deploying custom

modules.

- 64734 : Time elapse workflow with custom Date type fields cause PHP error when saving a record after upgrading.
- 64753 : The Edit View layout does not respect the Max Size limit set for address fields (e.g. billing street, billing state) in Studio.
- 64768 : The group by in Summation with Details-type report incorrectly displays "None" as first grouping.
- 64814, 65264 : Time-elapse workflows incorrectly store records for later triggering when the workflow's conditions are not met.
- 64822 : LinkedIn connector does not work as expected due to an incomplete removal of the connector from Sugar.
- 64959 : Sorting by Team field in list view does not sort as expected.
- 65023 : Merging records in Sugar incorrectly changes the Created by field for the primary record.
- 65073 : Sorting Reports list view by Date Created field does not sort as expected.
- 65271 : SMTP email password gets cleared in Admin > Email Settings when accessed by a non-default admin user causing "Send Test Email" to fail.

For more information on a bug or to provide feedback, use the SugarCRM Bug Tracker located at <http://www.sugarcrm.com/support/bugs.html>. To view the complete list of bugs fixed in this specific release, run a search using "6.5.16" in the Targeted Release field. Look for the bugs marked "Fixed" in the Resolution field.

To report a new issue found in this release, use "6.5.16" in the Found in Release field. Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

Supported Platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).

Acknowledgments

SugarCRM would like to thank the following community members for their help in resolving issues in Release 6.5:

- Aleš Pudil
- Alexei Avramenko, Letrium
- Antonio Musarra

-
- Aurélien Requiem, Loaded Technologies
 - Björn Schotte, Mayflower GmbH
 - Cedric Mourizard, Synolia
 - Daniel Gadd, Aura Information Security
 - Danil Sazonov, Richlode Solutions
 - Dave Miller
 - Enrico Simonetti, InsightfulCRM, Australia
 - Fabio Grande, Poker Spa
 - Frank Saguma
 - Jason Eggers
 - Jeff Bickart, NEPO Systems, LLC
 - Jens Jahnke, Telematika
 - João Morais, DRI - Consultoria Informatica, Lda.
 - Johan Westin, Redpill-Linpro
 - Jon Auer
 - Jonathan Cutting, EnableIT SugarUK Technologies Ltd
 - Kawai Cheung, OSSCRM, Inc.
 - Masaki Fukumitsu
 - Matthew Poer, Profiling Solutions
 - Maxime Dauphin
 - Rasmus Haglund
 - Ray Gauss
 - Tony Lin, Kratos Defense
 - Yannick Biet, Captivea
 - Yoann Hercouet, System in Motion
