Sugar Professional 6.5.12 Release Notes

Overview

This document describes enhancements to existing features, known and fixed issues, supported platforms, and acknowledgments for Sugar 6.5.12.

Feature Enhancements

Enhancements to existing features for Release 6.5.12 are listed below:

- Email marketing sort order : Email marketing records are now listed in reverse chronological order on the Send Test and Send Emails page.
- Module specific report search criteria : Viewing reports via module tabs' "View {Module Name} Reports" option correctly updates the report search criteria.
- View tasks in iCal : Option to display tasks in iCal when subscribing to the Sugar calendar.
- Google calendar integration : iCal integration now works on Google calendar to sync and view Sugar's calendar.
- Call and meeting pop-up reminder : Additional information has been added to the call and meeting pop-up reminders.

Known Issues

The following are known issues with Sugar 6.5.12:

- Shipping not updating due to Sugar Logic : Shipping field in the Grand Total and Line Items section of quotes does not update as expected when the Shipping field is calculated via Sugar Logic.
Bug associated with this issue: 62064
- Double quotes display incorrectly upon edit : Group Name fields with quotation marks display incorrectly when editing a quote after initial save.
Bug associated with this issue: 61817

Fixed Issues

The fixes for Release 6.5.12 are detailed below:

 - 49232 : Individuals on suppression target list receives email when campaign is sent.
 - 49989 : Attempting to use pagination after configuring the Meetings and Calls dashlet results in a MSSQL error.
 - 50136 : Search will incorrectly select a filter option after pagination when the "Blank" value is moved from the first position.
 - 50896 : Using the {::past::Contracts::type::} variable in the Workflow alert email template returns the unique Sugar ID associated to the contract type instead of the actual contract type value in the email.
 - 52173 : Adding Relate type fields to Sugar dashlet filters causes an error on the Home page.
 - 52879 : Renaming stock and custom modules with a relationship displays incorrect names in the Related Modules list of the Report Wizard.
 - 53488 : Calls and Meetings dashlet disregards team membership and displays all records when "Only My Items" filter is unchecked.
 - 54929 : Search fails to return results when item names are set as numbers for the Sales Stage dropdown field in Dropdown editor.
 - 56425 : Duplicate modules appear in the report's Related Modules list when a one-to-many relationship between a stock or custom module to Activities is created.
 - 56729 : Reassigning records in the Users module results in a database error.
 - 57298 : Reports incorrectly respect owner-only view role after the affected user's type is changed to system administrator.
 - 58494 : Opportunities created via the Quotes module do not respect the default value for the Opportunities Type field set in Studio.
 - 59163 : Currency field on mail merge template displays the output value with 6 decimal places instead of 2.
 - 60505 : Quotation marks in the line items Group Name and Product fields display incorrectly in Quotes detail view and PDF file.
 - 60579 : Sorting a Summation-type and Summation with Details-type report by a dropdown field column results in a database error in MSSQL.

 - 60590 : Autocomplete fails to pull up matches when including a space in the name.
 - 60887 : The From name on received email campaign is not readable when multibyte language is used.
 - 60973 : Calculated values from related module record does not populate as expected for the first record where the Sugar Logic formula is triggered.
 - 61126 : Search fields display outside of Basic and Advanced search panel when the browser window size is set too small.
 - 61149 : Editing the Elastic_boost_options dropdown field in Dropdown editor causes Full Text Search to fail.

-
- 61158 : Applications utilizing OAuth fail to activate successfully when using an SSL Load Balancer with requests passing over http.
 - 61341 : User DN is ignored when checking if a LDAP user is a member of a group.
 - 61797 : Shipping field in the Grand Total section of Quotes detail view does not update as expected when the Shipping field is calculated via Sugar Logic.
 - 61862 : Populating a target list using report results from a module (i.e. Accounts, Contacts, Leads, etc.) containing Sugar Logic dependency formula causes the application to time out.
