Sugar Ultimate 6.5.1 Release Notes

Overview

This page describes changes to existing features, fixed issues, supported platforms, and acknowledgments for Sugar 6.5.1.

Changes in 6.5.1

- Global Search enabled automatically if Full Text Search (FTS) is disabled â Disabling FTS in Sugar 6.5.0 resulted in disabling all search functionality; Global Search is available in Sugar 6.5.1 when the FTS is disabled

Fixed issues in Sugar 6.5.1

The following High/UrgentPriority issues have been fixed in this release:

- 39599 : Lead data with special characters submitted via Web-to-Lead forms is truncated
- 40573 : Day: Date Created in Summation Reports does not convert to user's time zone
- 45282 : Change Log displays incomplete list of updates
- 50126 : Unchecking Create Account or Select Account in the Lead Conversion page empties the (Account) Name field
- 50437 : Email disappears from the Compose Email pane (Emails module) after switching to the Inbox tab, moving the separation pane, and returning to the Compose tab
- 50549 : Selecting Is Not filter for multiselect value displays records that match the excluded condition
- 50843 : Editing a Call record and saving it removes the Contact record from the Call
- 51192 : Modified By User incorrect in workflow alert email if modification is via import
- 51298 : Reports omit data for January 2012
- 51346 : Adding a second Team displays a field populated with 1 instead of a radio button in the Teams section of a record when viewed in Internet Explorer 9
- 51427 : Setting Calculated values to Name fields removes the records from Global Search
- 51719 : Data not displayed in Summation with Details report when used with

-
- 52000 : Creating a custom one-to-many relationship between a module and itself and selecting multiple records in the subpanel adds the last selected record only
 - 52263 : Sending an email with Gmail as the InboundEmail client creates two
 - 52361 : Products records are not displayed in sub-panels
 - 52543 : Editing Calendar activities in modules removes the records from Calendar
 - 52783 : Navigating to more records in List View of Leads and Contacts displays a blank page
 - 52796 : Incorrect Opportunity amounts are displayed in Reports if the conversion factor for currencies is changed
 - 52939 : Price field displays incorrect currencies in Products sub-panels
 - 53412 : Values in custom drop-down lists in Users module cannot be selected and saved
 - 53662 : Text from one email draft is copied to the second email draft if multiple email drafts are open in the Emails module
 - 53707 : Email is sent to incorrect recipient and contains incorrect body text if multiple drafts are open in the Emails module
 - 53713 : Repair/build sprite code does not check the custom/ directory for new images
 - 53963 : Indexes and primary keys missing in *_audit (for example, accounts_audit, contacts_audit, etc.) tables for DB2, Oracle and SQL Server databases

For more information on a bug or to provide feedback, use the SugarCRM Bug Tracker located at <http://www.sugarcrm.com/support/bugs.html>. To view the complete list of bugs fixed in this specific release, run a search using 6.5.1 in the Targeted Release field. Look for the bugs marked Fixed in the Resolution field.

To report a new issue found in this release, use 6.5.1 in the Found in Release field. Check the Bug Tracker for known issues prior to submitting bugs. You will be able to update existing bugs with additional information, as necessary.

Supported Platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).
