Sugar Ultimate 6.5.25 Release Notes

Overview

This document describes fixed and known issues, supported platforms, and acknowledgments for Sugar Ultimate 6.5.25.

Fixed Issues

Sugar 6.5.25 is a security update released to address certain security vulnerabilities identified during our routine QA checks.

We strongly recommend that you install this update at the earliest opportunity. While we have not experienced any reported incidents relating to these vulnerabilities to date, failure to install this update could leave you exposed to malicious third party attacks. For more information regarding this, please refer to the following Security Advisory announcements:

- [Security Advisory sugarcrm-sa-2017-002](#): Authenticated users may cause arbitrary code to be executed.

These vulnerabilities have been addressed in release 6.5.25 which is available for download from the [Download Manager](#).

Administrators are strongly encouraged to upgrade their Sugar instances running 6.5.24 and prior to version 6.5.25 to prevent potential exploitation of these weaknesses.

Known Issues

The following are known issues with Sugar 6.5.25:

- 62064 : Shipping field in the Grand Total and Line Items section of quotes does not update as expected when the Shipping field is calculated via Sugar Logic.
- 73330 : Attempting to connect to the IBM SmartCloud application via the External Accounts tab does not work as expected.

Supported Platforms

For information on supported platform components, see [Sugar 6.5.x Supported Platforms](#).
