# IBM Notes Plug-in Release Notes 2.1.0

## Overview

This document describes feature enhancements and fixed issues for the Sugar Plug-in for IBM Notes 2.1.0. For information about supported versions of IBM Notes, refer to the [Plug-ins Supported Platforms](#).

## Feature Enhancements

New features and enhancements to existing features for Sugar Plug-in for IBM Notes 2.1.0 are as follows:

- [Mass archiving to Sugar](#) : IBM Notes emails can now be mass archived to Sugar records.
- [Mass linking to Sugar](#) : IBM Notes records can now be mass linked to Sugar records.
- [View Sugar invitee details](#) : Users are now able to view Sugar invitee details in IBM Notes when creating a meeting.
- **Sync confirmation** : A pop-up message will now appear to confirm if the sync was successful or unsuccessful.

## Fixed Issues

The following issues have been resolved in this release of the Sugar Plug-in for IBM Notes. [Support Portal users](#) can use the following links for more details about each issue:

- [72924](#): Certain date formats (e.g. dd/mm/yyyy, d/m/yyyy) defined in the user's computer may cause meetings or calls in Sugar to not sync as expected to IBM Notes.

## Known Issues

The following are known issues in this release of the Sugar Plug-in for IBM Notes. [Support Portal users](#) can use the following links for more details about each issue:

- [71955](#) : Past activities (e.g. meetings) synced from IBM Notes to Sugar improperly display as open activities with an Overdue status.
- [73890](#) : When an individual meeting from a recurring series is edited or

---

deleted in Sugar, the change does not sync as expected to IBM Notes.

- [73900](#) : Recurring calls and meetings may not sync as expected between IBM Notes and Sugar.
- [73902](#) : Linking recurring IBM Notes meetings with a status of "Scheduled" to a Sugar record does not sync as expected to Sugar.
- [73907](#) : IBM Notes records (e.g. To Do) synced to Sugar cannot be accessed in the Sugar instance as expected via the IBM Notes Sugar Actions menu. As a workaround, navigate to your Sugar instance to access the record. If the IBM Notes record is linked to a Sugar record (e.g. Account), then the record can be accessed in Sugar via the IBM Notes Sugar Actions menu.
