IBM Notes Plug-in Release Notes 2.1.6

Overview

This document describes feature enhancements and fixed issues for the Sugar Plug-in for IBM Notes (formerly IBM Lotus Notes) 2.1.6. For information about supported versions of IBM Notes, refer to the [Plug-ins Supported Platforms](#).

Feature Enhancements

The following feature enhancements are included in this release of the Sugar Plug-in for IBM Notes:

- **Improved handling for events chaired by non-Sugar users** : An administrator can configure Sugar to assign meetings to a default user account when a meeting from IBM Notes syncs and is chaired by a non-Sugar user.
 - **Note:** This functionality was removed in a later release (v2.3.1) of the Sugar Plug-in for IBM Notes.
- **Unsyncing meeting records** : After an IBM Notes meeting has been synced to Sugar, the Sugar Actions menu in IBM Notes will display an option to "Unsync and Delete", which discontinues future sync events for the meeting and asks the user if they would like to simultaneously remove the meeting's data from Sugar.

Fixed Issues

The following issues have been resolved in this release of the Sugar Plug-in for IBM Notes. [Support Portal users](#) can use the following links for more details about each issue:

- [75782](#) : Users cannot use drag-and-drop to change the start date or time of one occurrence of a synced recurrent meeting.
- [77948](#) : The "Select Email from Sugar" option may not find contact names that contain special characters such as é, à, ú, and ð.
- [78040](#) : Non-Sugar attendees are removed from IBM Notes after syncing with Sugar.
- [78161](#) : A meeting attendee may be incorrectly promoted to meeting organizer in IBM Notes if the attendee is using the Sugar plug-in but the organizer is not.

Known Issues

The following are known issues in this release of the Sugar Plug-in for IBM Notes. [Support Portal users](#) can use the following links for more details about each issue:

- [74482](#) : Importing a vCard from IBM Notes to Sugar does not work as expected.
- [77895](#) : IBM Notes does not update synced meetings when the user edits the meeting in Sugar.
- [77924,77925](#) : Deleting the parent occurrence of a synced, recurring meeting will result in sync failure or deletion of the entire series on one or both sides.
- [78968](#) : The "Unsync and Delete" functionality has no effect on recurring meetings.
