IBM Notes Plug-in Release Notes 2.1.1

Overview

This document describes feature enhancements and fixed issues for the Sugar Plug-in for IBM Notes 2.1.1. For information about supported versions of IBM Notes, refer to the [Plug-ins Supported Platforms](#).

Fixed Issues

The following issues have been resolved in this release of the Sugar Plug-in for IBM Notes. [Support Portal users](#) can use the following links for more details about each issue:

- [73890](#) : When an individual meeting from a recurring series is edited or deleted in Sugar, the change does not sync as expected to IBM Notes.
- [73900](#) : Recurring calls and meetings may not sync as expected between IBM Notes and Sugar.
- [73902](#) : Linking recurring IBM Notes meetings with a status of "Scheduled" to a Sugar record does not sync as expected to Sugar.
- [73907](#) : IBM Notes records (e.g. To Do) synced to Sugar cannot be accessed in the Sugar instance as expected via the IBM Notes Sugar Actions menu. As a workaround, navigate to your Sugar instance to access the record. If the IBM Notes record is linked to a Sugar record (e.g. Account), then the record can be accessed in Sugar via the IBM Notes Sugar Actions menu.

Known Issues

The following are known issues in this release of the Sugar Plug-in for IBM Notes. [Support Portal users](#) can use the following links for more details about each issue:

- [71955](#) : Past activities (e.g. meetings) synced from IBM Notes to Sugar improperly display as open activities with an Overdue status.
- [74450](#) : A recurring meeting created in Sugar where the recurring day differs from the start day may have its first meeting removed from the IBM Notes calendar once the series has been synced to and saved in IBM Notes.
- [74482](#) : Importing a vCard from IBM Notes to Sugar does not work as expected.
