# Sugar Corporate 7.7.2.3 Release Notes

## Overview

This document describes the changes and functionality available in Sugar Corporate 7.7.2.3.

Sugar 7.7.2.3 is available for both On-Demand (Sugar-hosted SaaS) and On-Site deployments.

## Administrator and End User

### Fixed Issues

Sugar 7.7.2.3 is a security update released to address certain security vulnerabilities identified during our routine QA checks.

We strongly recommend that you install this update at the earliest opportunity. While we have not experienced any reported incidents relating to these vulnerabilities to date, failure to install this update could leave you exposed to malicious third party attacks. For more information regarding this, please refer to the following Security Advisory announcements:

- [Security Advisory sugarcrm-sa-2017-006](#): Authenticated users may cause arbitrary SQL to be executed.
- [Security Advisory sugarcrm-sa-2017-007](#): Authenticated users may access system files.
- [Security Advisory sugarcrm-sa-2017-008](#): Unauthenticated users may cause arbitrary code to be executed.

These vulnerabilities have been addressed in release 7.7.2.3 which is available for download from the [Download Manager](#).

Administrators are strongly encouraged to upgrade their Sugar instances running 7.7.2.2 and prior to version 7.7.2.3 to prevent potential exploitation of these weaknesses.

### Known Issues

The following are known issues in this release. [Support Portal users](#) can use the following links for more details about each issue:

---

## Additional Product Information

Sugar 7.7.2.3 does not include support for the following pieces of functionality:

### Supported Platforms

For information on supported platform components, see [Sugar 7.7.x Supported Platforms](#).

### Upgrade Paths
